

# Student Story Card 2

Meet Karen, a 6th-grade student who receives speech services for articulation two times per week as well as individual counseling.

During COVID-19, the school district has informed Karen's family that they will be offering virtual learning as a platform for students to receive their education at home.

Although the school will provide a laptop computer for students during the crisis, Karen's family cannot afford to pay for the internet service. She wonders how she will connect with her school.
